

Freight Mobility Strategic Investment Program

AVAILABLE FUNDING

FMSIB is issuing this call to maintain a 6-year list of active projects. There is **NO** money available at this time to fund the current list of projects or the ones we will select during this 2002 call. If voters pass R-51 in November, most of our existing projects will be funded. There is **NO** additional money identified in R-51 for additional projects. The Board will continue to seek future funding from the legislature for all board approved freight projects. Projects should be ready for construction no sooner than 2006. Projects must directly improve freight movement not be a secondary beneficiary. Studies will not be considered at this time due to the large backlog of unmet freight construction needs **Projects on the current list of FMSIB projects do not need to apply again. These projects will retain their position on the list.** The projects that are prioritized from this call will be added to this list.
